Time Zone Names & Time Difference by GREATDATA.COM

Time zones are measured from Greenwich, England. North American time zones are behind GMT (now called, 'UTC') and our chart tells you how many hours a zone is behind UTC. For instance, when it is 1:00 p.m. in the Eastern Time Zone, it is already 6:00 p.m. in Greenwich.

Note: Some time zones don't have standard names, so we created our own zone codes. This chart contains Standard Time, not Daylight Savings Time (usually, this doesn't matter). To find the difference between your time zone and another, just find your time zone and the other zone on the chart, subtract the lesser number of hours behind GMT from the greater number of hours. If your time zone is *above* the other zone, you are *ahead* of that zone. For instance, if you are in the Eastern Time Zone and you need to call Hawaii, you will subtract 5 from 10 and since you are above Hawaii on the chart and are ahead of them by 5 hours.

Also Note: Area codes which cross more than one time zone (at least part of the year) are noted by an Asterisk (*) on the Area Code/Time Zone Master List.

| Zone Code | Time Zone Description | Hours behind GMT |
